DETAILED ACTION

This is in response to communication filed 01/09/04.

1. Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Whitmyer, Jr. (US 6049801).

The applied reference has a common Inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Whitmyer discloses: a system for automating the recordation of a property transfer comprising: an Internet server (56, fig. 3-4 and corresponding text, Whitmyer); a communications link between said Internet server and the Internet (18, fig. 3 and corresponding text, Whitmyer); at least one database (14, 84, fig. 6 and corresponding text, Whitmyer) containing a plurality of information records accessible by

Art Unit: 2161

said Internet server, each information record including an intellectual property identification number (col. 7, lines 43-62, Whitmyer); at least one database (64, fig. 4 and corresponding text, Whitmyer) containing a plurality of recordation forms accessible by said Internet server (col. 6, lines 25-54, Whitmyer);

In addition, Whitmyer discloses: software executing on said Internet server for querying said database of information records to retrieve an information record corresponding to a transfer request for querying said database of recordation forms to retrieve a recordation form corresponding to said transfer request (fig. 3-4, col. 5, lines 43 to col. 6, lines 54, Whitmyer).

Regarding claims 3 and 8, all the limitations of these claims have been noted in the rejection of claim 1. It is therefore rejected as set forth above. In addition, Whitmyer discloses: a at least one database (perfectlaw database) containing a plurality of information records accessible by said Internet server, each information record including an intellectual property identification number and a jurisdiction identifier (col. 7, lines 43-62, Whitmyer);

at least one database (64, fig. 4 and corresponding text, Whitmyer) containing a plurality of recordation forms accessible by said Internet server, each information record including an intellectual property type identifier and a jurisdiction identifier (col. 6, lines 25-54, Whitmyer);

software executing on said Internet server for receiving a transfer request indicative of a transfer of rights to the property (col. 4, lines 13-34, Whitmyer).

In addition, Whitmyer disclose: software executing on said Internet server for querying said database of information records to retrieve an information record corresponding to a transfer request for querying said database of recordation forms to retrieve a recordation form corresponding to said transfer request (fig. 3-5, col. 5, lines 43 to col. 6, lines 54, Whitmyer), and for combining the retrieved information record with the retrieved recordation form to generate a document (col. 7, lines 19-42, Whitmyer).

Whitmyer discloses: software executing on said Internet server for transmitting said property transfer request form through the Internet (fig. 3-5, Whitmyer);

software executing on said Internet server for receiving a reply to said property transfer request form (col. 5, lines 43-col. 6, lines 54, Whitmyer);

software executing on said Internet server for transmitting said transfer document through the Internet (col. 4, lines 13-34, Whitmyer);

software executing on said Internet server for querying said database of information records to retrieve information records corresponding to said intellectual property information request (col. 4, lines 42 to col. 5, lines 13, Whitmyer);

software executing on said Internet server for updating said database containing a plurality of information records (col. 5, lines 36-42, Whitmyer).

Regarding claims 2, 4 and 9, most of the limitations of these claims have been noted in the rejection of claims 1, 3 and 8 above, respectively. In addition, Whitmyer discloses: wherein said property is intellectual property such as patents, copyrights, and trademarks (col. 7, lines 19-42, Whitmyer).

Regarding claims 5 and 6, all the limitations of these claims have been noted in the rejection of claim 3. In addition, Whitmyer discloses: comprising of software executing on said Internet server for receiving and transmitting an executed transfer document (col. 4, lines 13-34, Whitmyer).

Regarding claim 7, all the limitations of this claim have been noted in the rejection of claim 3. In addition, Whitmyer discloses: comprising of software executing on said internet server for transmitting said executed transfer document to a property recordation authority (col. 5, lines 43-col. 6, lines 55, Whitmyer).

Regarding claim 10, all the limitations of this claim have been noted in the rejection of claim 8. In addition, Whitmyer discloses: comprising of software executing on said internet server for retrieving said updated to said database containing a plurality of information records through the internet from a plurality of sources (col. 7, lines 19-42, Whitmyer).

3. Conclusion
